EMPLOYMENT HISTORY

Jul 2026 — Present **Junior Full-Stack Developer, Evotech Software Solutions Inc.** — Cebu City

- Develop Seller Investigators, Carbon6's platform that recovers reimbursements Amazon owes FBA sellers, in a Laravel, Vue 3, and MySQL codebase.
- Built and extended an email-campaign tool for the customer success team with audience targeting, scheduled and batched sending, delivery health checks that recover stalled sends, and outcome reports.
- Made the product's Python and Selenium automation more dependable.
- Fixed data-integrity and access-control issues in background jobs and admin workflows, backed by PHPUnit tests and static analysis in CI.

Jul 2023 — Nov 2023 **Customer Experience Agent, Teleperformance** — Cebu City

- Handled customer complaints with detailed questioning, and monitored satisfaction metrics to spot trends and address areas of concern.

VOLUNTEER EXPERIENCE

Aug 2026 — Present **Director, Administration & Technology (Board of Directors), SDAHA International** — Remote

- Lead technology for a Texas 501(c)(3) nonprofit that helps families in Texas and the Philippines; built and launched sdahacares.org with online giving campaigns and intake forms.
- Built a staff portal for request triage, volunteers, and campaign updates (in staging), and drafted privacy and access policies with the founder.

INTERNSHIP HISTORY

Nov 2025 — Apr 2026 **Production Web and Mobile App Developer Intern, Symph Inc.** — Cebu City

- Built and maintained LessonPlannerPH, a production web app for AI-assisted lesson planning, using Next.js, TypeScript, and modern UI libraries.
- Shipped UI improvements, v2 product features, admin tooling, performance optimizations, and backend logic changes from design and engineering specs.
- Applied company standards for code structure, naming, security, and deployment in a production codebase, with collaborative development and code reviews.

Jan 2025 — May 2025 **ServiceNow Developer Intern, Rococo Global Technologies** — Cebu City

- Project Manager & Lead Developer for a team of 7 interns delivering a ServiceNow web-based enrollment system.
- Designed the data model (Students, Courses, Sections, Enrollments) and built catalog items, Flow Designer workflows, and Business Rules/Script Includes to automate registration, waitlists, and approvals.

EDUCATION

2022 — 2026 **Bachelor of Science in Computer Science, University of Cebu Lapu-Lapu & Mandaue** — Mandaue City

- Coursework in **Data Structures & Algorithms**, **App Development**, **Relational Databases**, **Software Engineering**, **Compiler Design**, **Computer Organization**, **Assembly**, **Natural Language Processing**, **Machine Learning**, and **Neural Networks**.
- Dean's Lister for 5 semesters

PROJECTS

Manifesto – Led development of an AI document intelligence system that extracts shipment details from **100–500 page contracts and manifests**, using a **FastAPI pipeline** that validates its own output and a **cost-optimized LLM profiling algorithm**; frontend in **Next.js**, **React**, **Tailwind CSS**, and **shadcn/ui**. **Won the grand prize** against teams from top universities in Cebu.

Kimo – Self-hosted learning dashboard that turns Markdown notebooks into flashcards, recall exercises, and in-browser code labs (via **WebAssembly**), and queues learning jobs for AI coding agents. Built with **Nuxt 4**, **Vue 3**, **TypeScript**, **SQLite**, and **Docker**.

Dex – AI agent that triages, preprocesses, classifies, and extracts structured content from unstructured and semi-structured documents, with document versioning. Built with **LangGraph**, **RAG**, **vector embeddings**, and LLM workflows.

Pulox – Hybrid post-ASR error correction and summarization pipeline for English–Tagalog lecture transcripts, combining **Whisper**, **Wav2Vec 2.0**, **mT5**, and **T5** with LLMs (Gemini, Groq, OpenAI) behind authenticated **FastAPI** endpoints. Built with **Next.js**, **Python**, and **Supabase**; deployed on **GCP**, **Vercel**, and **DigitalOcean**.

Gradiant – Progressive Web App that helps teachers record grades, monitor attendance, generate reports, and analyze class performance in real time on desktop and mobile. Built with **Next.js**, **TypeScript**, and **PostgreSQL**.

CampusFlow – Student enrollment system with a multi-approval workflow and role-based access control. Built with **ASP.NET Core MVC**, **C#**, **JavaScript**, **Razor Pages**, and **PostgreSQL**; deployed to **Azure**.

Bisaya (Cebuano) Sentiment Analysis – Scraped over 20,000 local news articles and trained an **NLP** classifier that detects positive and negative sentiment.

AWARDS

Mar 2026 **Grand Prize Champion**, OLTEK Solutions Data: Logistics Automation Challenge

2026 **Top 10 Semifinalist**, LAMBO 2026 AI-Powered Business Case Competition

CERTIFICATIONS

DICT-ICTB02 Basic Level of Software Engineering

11th TOPCIT Philippines – Level 2 Passer

SKILLS

Languages: Python, TypeScript, JavaScript, PHP, C#, Java, C, HTML/CSS

Frameworks/Libraries: React, Next.js, Laravel, Vue 3, Nuxt, FastAPI, Tailwind CSS, .NET

Databases: PostgreSQL, MySQL, Redis, SQLite, Supabase, Neon.Tech

Deployment: Vercel, Cloudflare, Docker, Azure, GCP, AWS, DigitalOcean

AI & Automation: LLMs, Agentic AI, RAG, NLP, Machine Learning, ASR (Whisper, T5, mT5), Selenium, ServiceNow Flow Designer

Tools/Other: GitHub Actions, pytest, PHPUnit, Postman, Linux, Jupyter
